OBJETIVOS

- Dexway Fast English B1.2 is a highly visual course, which takes the learner from Pre-intermediate to Lower-intermediate level. Using video as the main format to present new expressions and structures, the learner sees how the language is used by native speakers, in meaningful contexts, simulating the way we learn our first language - naturally. The use of video makes the course accessible and entertaining - meaning that learners grasp concepts quickly. There are exercises based on the communicative aspects of the content, rather than the grammar, which is covered in context.
- Students are presented with more complex concepts of the English language and are encouraged to improve their pronunciation through interactive exercises. The language skills acquired in the course will enable students to communicate confidently in a range of typical contexts and maintain conversations in everyday situations. They will also start to see useful language for more specialised areas such as household chores, using the telephone and telling anecdotes. There is an introduction to ways of comparing, expressing conditions and giving advice in preparation for the coming levels.
- By the end of the course, students will have seen the language necessary to go about daily life in an English-speaking country - in particular, to communicate over the telephone, talk about the past and to talk about more abstract concepts such as expressing purpose or making suggestions. In addition to the vocabulary, the course also includes the necessary grammar to deal with more complicated topics such as talking about the recent past and speculating about an image or expressing ideas about the past, present and future in more detail.
- The course also includes specific speaking and writing assignments focusing on the main grammar and vocabulary of each unit as well as practice with mediation-style tasks. In addition to the more controlled practice provided by the assignments, AI role-plays offer free practice with the topics covered - giving learners the opportunity to participate in spontaneous speaking activities, replicating realistic exchanges.
