

English Dexway Academy with AI Role-plays - B2.2

Sku: PC248

Horas: 40

OBJETIVOS

The course content remains functional and focused entirely on improving learner independence in all areas, especially in real-life situations such as work and leisure, house and home, films and habitual actions etc. In terms of grammatical structures there will be continued revision and extension of the structures in all tenses with emphasis on parts of the language such as more phrasal verbs, idiomatic expressions and the differences between British and American vocabulary. As with the other levels on the course, there is frequent pronunciation practice and the learner has exposure to long and short sounds, correct regular past tense endings, vowel sounds, elision as well as general vocabulary and sentence level practice. At this point the learner can maintain a conversation with a native speaker on a wider range of subject areas. The variety of exercises not only caters for different learner styles but also guarantees thorough coverage of the topics covered. AI role-plays offer free practice with the topics covered - giving learners the opportunity to participate in spontaneous speaking activities, replicating realistic exchanges.
