OBJETIVOS

This course for pre-intermediate learners presents vital aspects of the English language, with content at the B1.3 level of the CEFR. By covering the essential grammar and vocabulary needed to talk about the future, report what someone said, deal with simple shopping situations and express conditions, the course gives learners the necessary tools to start using the language straight away. Learners also see modal verbs, vocabulary related to the countryside, different ways to form questions as well as comparative and superlative structures. Learners participate in role-play and conversation activities which encourage them to use the language spontaneously and meaningfully. The writing and speaking assignments that follow offer the chance to use the language in a range of situations. The student needs to follow the instructions to create short written and spoken texts which allow them to reuse the new language independently.
