OBJETIVOS

This course for mid-intermediate learners presents vital aspects of the English language, with content at the B2.2 level of the CEFR. By covering the essential grammar and vocabulary needed to express quantity in a variety of ways, make and deal with complaints and add emphasis, the course gives learners the necessary tools to start using the language straight away. Learners also see how to describe personality, talk about illnesses and injuries, discuss mass media and form defining and non-defining clauses. Learners participate in role-play and conversation activities which encourage them to use the language spontaneously and meaningfully. The writing and speaking assignments that follow offer the chance to use the language in a range of situations. The student needs to follow the instructions to create short written and spoken texts which allow them to reuse the new language independently.
